

**25 - 27 march 2022**

Guest-lecturer in the Netherlands, Zwolle

- Academie voor Klassieke Homeopathie -

My heart is full of joy and thanks for these days together with teachers and students of Homoeopathy. I toured around the world, to the Far East and the Far West, I met many Homoeopaths and Institutions in different cultures on this way. But I have never met such a combination of generosity, friendship, competence, tolerance, humor under one human umbrella like in Zwolle. I am proud and happy that we have such a competent and understanding representation of Homoeopathy in Europe. I must say, “with a tear in my buttonhole” that this attitude unfortunately is the exception, because in many European countries, especially in Germany, the motherland of Homoeopathy, negative meanings and energies are spread against our successful and brilliant work in Homoeopathy. Therefore, I regard the AVKH.nl as an example of tolerance and open-mind. My working there was pure joy although my subjects “Regeneration of blood” and “Holistic cancer treatment with Homoeopathy” were strenuous. I was fulfilled with sympathy, interest, and creativity by the attendees – exactly what we need among Homoeopaths.
